CLASSROOM RENTAL PROGRAM

School jurisdictions undergo yearly student enrollment changes that affect education space requirements. Long-term capital building programs can take years to approve and implement and often become obsolete quickly due to changing needs.

Communities grow and change, but traditional brick-and-mortar schools remain in their original locations. Our Classroom Rental Program was designed specifically to address these changing needs in a practical and timely way.

WHY RENT?

Our rental program provides an effective solution to meet all educational space needs. Renting provides the following benefits:

- Short term (min 12 month) and long term rentals with options to purchase, or extend lease
- Renting allows Schools to use rental fee as an operating expense vs capital expenditure
- Our team provides complete transportation and set up to your site
- Customization options available
- Multiple configurations and sizes including multi-storey options

GUARANTEE

Our systems-built approach to the classroom design enables us to create a building envelope that is cost effective, and easy to transport and install. GCS classrooms accommodate future expansion and relocation projects. Customizations are code compliant nation-wide and can adhere to programs such as LEED, Energy Star, etc.

We guarantee safe and high quality educational facility to meet your needs. Our in-house delivery and installation teams ensure long-term performance.

ADDITIONAL INFORMATION

- Energy efficient building envelope
- High-end interiors
- Building materials chosen improve air quality
- Single classrooms to mini-school complexes available
- Smart mechanical controls that can be easily connected to core building
- Multi-storey options for space constrained sites
- Washroom options available
- Large window wall to promote maximum daylight
- Power and high speed data
- Classrooms are relocatable within the rental term
